

Designer Giuseppe Bavuso, year 2016

Thanks to its elegance, the bar cabinet always knows how to get noticed and becomes a true focal point.

A class complement that invites to exclusive moments of social meeting and sharing. The rediscovery of the decorative arts from the East gives the furniture an original bright and shiny lacquered effect. The reflections of the surfaces and the metallic gleams of the handle are the assets of a collection that explores the material to bring its hidden refinement to light.

Oriental Bar Reel
