

Designer Giuseppe Bavuso

Dune is an elegant and versatile swivel armchair with compact dimensions, perfect for furnishing refined environments that fits harmoniously into both residential and contract contexts, both day and night areas. The frame of the armchair is made of solid fir, with backrest and seat in polyurethane foam, with different densities to ensure comfort and durability over time. A distinctive detail that gives Dune uniqueness is the painted steel support bracket, covered in solid ash. Its swivel base and the wide choice of fabric or leather upholstery make the Dune armchair the ideal solution for creating elegant and practical corners in any environment.

Dune

Armchair / Swivel armchair. Frame in solid fir. Back and seat in polyurethane foam of different densities covered with polyester fiber lining. Supporting bracket for back in painted steel, covered in stained ashwood applied by means of magnets. Stained wooden base, 360° swivelling on demand, feet in thermoplastic material. Removable fabric cover upon request or leather cover. Technical sheet
