

Designer angelettiruzza

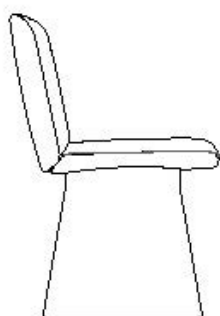

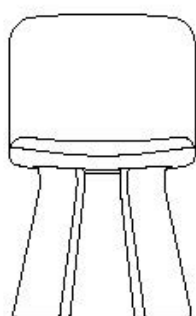

Ila is a chair with a soft design and harmonious lines, perfect to enhance contemporary spaces, but also suitable for more traditional settings. Thanks to its ability, Ila stands out with its versatility which allows it to change appearance depending on the covering chosen from the wide range of leather or fabric, thus becoming a unique piece that adapts to different style requirements.

The steel internal frame, covered in flexible cold polyurethane foam, guarantees resistance and comfort, while the possibility of choosing between the many types of covering means being able to customise each chair in order to adapt it perfectly to the environment in which it will be contextualised.

Ila

Chair. Cold shaped polyurethane foam padded steel frame. Fabric or leather covers.
