

JOEL Chest of drawers

Designer: Marco Acerbis

Year: 2025

DESCRIPTION:

The Joel chest of drawers is an element of great visual presence and stands out for its monolithic structure lightened by wooden frames and leather details that invite the touch, while the base, raised by metal frames, helps to mitigate the imposing volumes. A refined wooden support with leather details is positioned on the top: in the dresser it remains firmly anchored to the structure, while in the bedside table it can be removed and used as a real tray.

JOEL Chest of drawers

Designer: Marco Acerbis

Year: 2025
