

NABI Chair

Designer: Marco Acerbis

Year: 2025

**DESCRIPTION:**

The structure of Nabi, similar to an "L", shows a seat and a backrest joined in a single fluid shape, to create a coherence of spaces and surfaces that meet in a natural way. The choice of a simple, but well-defined shape is not only aesthetic: the dry structure and the essential design, without invading the surrounding space, offer a feeling of lightness that invites you to sit down. Available in the version with or without armrests, Nabi adapts to the different needs of practicality and style.

NABI Chair

Designer: Marco Acerbis

Year: 2025

TECHNICAL:

Structure: walnut stained ash / **Seat:** plywood with differentiated density polyurethane foam, non-removable leather or fabric covering. **Chairs in leathers:** profiles are dyed with the sticage technique (black color). There is a metal zipper on the back. **Chairs in fabric:** profiles and seat stitching finished with leather piping, 1159P, 1296P o 1170P. This version does not have a metal zipper on the back.
